

COMORBID CONDITIONS

Check or Circle

Acute pulmonary edema

Anemia due to:

- acute blood loss
- chronic disease

Anoxic brain injury

Aspiration pneumonitis

Atrial fibrillation flutter

CHF chronic

diastolic (EF \geq 40%)

systolic (EF <40%)

Coma

Decubitus ulcer---note stage and site

Stage 1 2 3 4

Site _____

Delirium due to:

- infection
- drugs or toxin
- metabolic effect
- other

Demand Ischemia

Diabetes

type 1

type 2

controlled

uncontrolled

Electrolyte abnormality:

hypokalemia

hyperkalemia

hyponatremia

hypernatremia

Attending Physician Name & ID # _____

Attending Physician Signature _____

Time / Date _____

Encephalopathy

Malignant hypertension

Malnutrition

mild/moderate

severe

Pleural effusion

Pneumonia

PSVT

Renal Failure

acute

chronic

Respiratory Failure

acute

chronic

Sepsis

UTI

UTI (catheter associated)

Seizure type _____

Shock

cardiogenic

hypovolemic

Septic

Other: _____
